

Were you a former student of London Colney Secondary School?

(closed 1984)

We are hoping to establish what the teaching areas were used for
before the fire (c1980)
and between the re-building and closure in 1984

This aerial image is recent and of course is very much a view of the Business Centre, rather than the school. The lettered areas may help to identify the various accommodations when it was functioning as a secondary school.
